Mancherla, Telangana.

github.com/vishal-garige

SKILLS

- Programming Languages:
Python, Java, C, JavaScript.
- Core CS Areas: Data Structures, Algorithms, Graph Theory, Algorithm Design & Analysis, computer networks.
- Algorithms: Searching, Sorting, Greedy Algorithms, BFS, DFS, Basic Dynamic Programming.
- Tools & Libraries: Git, GitHub, NetworkX, Matplotlib, Pandas

LANGUAGES

- English (Fluent)
- Hindi (intermediate)
- Telugu (Mother tongue)

CERTIFICATIONS

Algoniversity Certificate (DSA)

be10x AI Tools Workshop

linkedin <https://www.linkedin.com/in/vishal-garige-94a09b391/>

PROFILE

Second-year B.Tech Mathematics & Computing student at NIT Kurukshetra (2028) with a strong academic foundation and a keen interest in theoretical and applied research. Proficient in algorithms, data structures, and experimental analysis, supported by rigorous training in Probability & Statistics and Linear Algebra for mathematical modeling and inference. Possesses a working understanding of Computer Networks and system-level principles. Experienced in formulating problem statements, designing controlled experiments, and presenting insights through structured technical documentation. Actively engaged in competitive programming and exploratory projects to deepen problem-solving ability and research aptitude.

PROJECTS

Smart Student Dashboard (Web App)

2026 APR - 2026 MAY

- <https://smart-student-dashboard-ochre.vercel.app/>
- Built using React with dynamic state handling and API integration.
- Backend framework is designed by using Express.js.

RESEARCH PROJECT

Experimental Evaluation of Graph Traversal Algorithms

2026 Jan - 2026 March

- Designed and conducted empirical evaluation of BFS and DFS across sparse, dense, and tree graph structures.
- Implemented traversal algorithms from scratch in Python and generated controlled graph datasets using NetworkX.
- Measured execution time and peak memory usage on graphs with up to 3,000 nodes and visualized trends using Matplotlib and Pandas.
- Analyzed discrepancies between theoretical complexity and real-world performance and documented findings in a formal research-style PDF report (Available on my github).

PROBLEM SOLVING & DSA

- Solved 200+ problems on LeetCode, spanning arrays, strings, recursion, trees, graphs, and binary search.
- Strong hands-on experience with BST operations and graph traversal techniques (BFS, DFS).
- Solid grounding in Algorithm Design & Analysis, with a focus on time-space complexity optimization.

EDUCATION

Bachelor of technology

National Institute of Technology Kurukshetra

2024 - 2028

GPA: 8.95 (curr cgpa).

Secondary school

Sri Chaitanya Junior college

2022 - 2024

percentage: 98.6%
